

**Department of Romance Studies
and Research centre
Theories, Methods, and Models in Contemporary Linguistic Research
at the Faculty of Arts, University of South Bohemia**

are pleased to invite you to a workshop

Selected issues in Romance word-formation

Programme

Oral presentations

Irene Lami: Internal anaphora in Italian argumental compounds: data from acceptability judgments

Sophie Delforge: Paradigmatic tendencies in NN compounds in the terminology of corporate communication in French: the example of sustainable development

Silvia Micheli: New markers of intensification in Italian: the case of *uber-*

Round Table: Compilation Thesis in Linguistics under Joint Supervision – Results, Experiences, Reflections

Irene Lami, Jan Radimský – Lund University (Sweden), USB (CZ)

Egle Mocciaro, Kristýna Lorenzová – Masaryk University in Brno (CZ)

Thursday, April 24, 2025 at 1:00 PM – Room S8

Irene Lami is a doctoral student at the Department of Italian Studies at the Centre for Languages and Literature at Lund University, Sweden. Her research focuses on morphosyntax and word formation in Italian, with special attention to the processes of compounding. Her work adopts an interdisciplinary approach integrating theoretical linguistics and psycholinguistics, with the primary aim of analyzing the rules and mechanisms governing the formation of compound words in Italian.

Sophie Delforge is a doctoral student at the CLLE (Cognition, Languages, Language and Ergonomics) research unit at the University of Toulouse Jean Jaurès, France. She is also a part-time lecturer, teaching methodology for linguistics. Her research focuses on binominal compounds particularly in financial discourse, through a diachronic perspective. Her work integrates insights from Construction Morphology and textual terminology approaches to study the structural evolution and paradigmatic tendencies of these compounds.

Silvia Micheli is an adjunct professor at the University of Milan. From 2019 to 2022 she was a research fellow at the University of Milano – Bicocca. Her research focuses on Italian word formation and evaluative morphology. She has authored a monograph on Italian compounds from a diachronic perspective published by De Gruyter.
